

## 21 years of Executive Search

AAAI Search celebrates our 21<sup>st</sup> year of Executive Search success in 2014 with a new initiative for Consultants, Search Practitioners, Solo Operators and Owners of Search consultancies who wish to join an expanding Search Network. Executive Search Network Alliance established by AAAI Group and registered as a legal entity in Australia is a global network of like-minded Search Professionals operating in the Energy, Resources, Infrastructure, Natural and Built Environment market sectors with operations in over 20 countries.

We are now expanding this network across Australia as AAAI Search. We offer the highest Fee Split in the industry. We also provide you access to a huge database built up over 21 years of business and thousands of completed assignments covering candidates from technical specialists across all disciplines to Board level C Suite Executives to entire project teams. We provide administration and invoicing; marketing material; mentoring and training in Search methodology; and most importantly, a collegiate team culture sharing assignment opportunities. Computing in the Cloud technology means Search service providers no longer need to be tied to an office. You can operate and provide our full suite of recruitment services from your PC at home or your laptop at your local wireless hotspot enjoying your coffee. The choice is yours.

On the other hand you need to have a least 5 years white collar recruitment experience working in one or more of our market sectors in Australia, enjoy developing and maintaining client/candidate relationships, be respected for having robust ethical standards, and have a passion for providing an outstanding service above and beyond the highest level in the recruitment industry.

Interested? Then call Gordon Hayes on 0414 316 262, or Richard Ottawa on 0411 545 768 or Peter Reynolds on 0411 075 418 for a confidential discussion in the first instance.
